Acknowledgement

It has been said that we are built on the shoulder of others. For everything we have achieved, the credit goes to all those who has really helped us in completing this project successfully.

We are thankful to Prof. Jayshri Patil for providing us the guidance and sparing their valuable time for us, as a result that we could successfully complete our project. Without this assistance and guidance, it would have been difficult to complete the project.

We thank our college for providing us with good faculties, Digital library, and project laboratory facilities which helped us to enrich our knowledge. Also we are very much thankful for our college Sarvajanik College of Engineering & Technology, Surat, which provide us a good study environment & available access to get literature.

ABSTRACT

Our project is a web-based tech-gadget selling system. The project objective is to deliver the tech-gadgets shopping application into android platform. Our project is an attempt to provide the advantages of online shop to customers of a real shop. It helps buying the products online through internet connection by sitting anywhere in the world. Thus, the customer will get the service of home delivery of his/her products purchased. This system can be easily accessible through smartphones as it is always available.

1. INTRODUCTION

This project is a web-based online tech-gadget selling system.

This project is developed to sell tech-gadgets like CPU Cooler, RAM, SSD, Motherboard any many more. This is a user-friendly website in which a customer can view the product and price of the product which he/she is purchasing.

This system also provides the detailed description about the products.

1.1 PROPOSED SYSTEM AND ITS OBJEVTIVES

The "Online Tech Gadget Selling System" has been developed to override the problems prevailing in the practicing manual system.

This project allows users to buy tech gadgets online which are needed in day-to-day life. This includes graphics card, PC cabinet, CPU cooler, RAM, SSD, Mouse, etc. This is a user-friendly website in which customer can view the item and price of the item it is buying.

The main objective of the Project on Online Tech Gadget Selling System is to manage the details of Customer, Product, Category, Order, Payment etc.

1.2 CORE COMPONENTS

- ☐ Manage Category
- ☐ Manage Product
- ☐ Manage Order
- ☐ Manage Order Details
- ☐ Manage Wishlist
- ☐ Manage Payment
- ☐ Manage Customer Review

1.3 MINIMUM AND MAXIMUM SOFTWARE/HARDWARE REQUIREMENTS

Minimum Software Requirements

Operating System : Windows 7

Front Design : HTML, CSS, JavaScript, Bootstrap,

Database: SQL

Backend Language : c#

Tool Used : Microsoft visual studio 2022

Brower : Chrome, Firefox etc.

Maximum Software Requirements

Operating System : Windows 11

Front Design : HTML, CSS, JavaScript, Bootstrap,

Database: SQL

Backend Language : c#

Tool Used : Microsoft visual studio 2022

Brower : Chrome, Firefox etc.

Minimum Hardware Requirements

Minimum RAM : 1GB

Hard Disk : 128 GB

Processor : Intel Pentium 4(1.50 GHZ) or above

Ethernet connection (LAN) OR a wireless adapter (Wi-Fi)

Maximum Hardware Requirements

Minimum RAM : 8 GB

Hard Disk : 512 GB

Processor : Intel Pentium 4(1.50 GHZ) or above

Ethernet connection (LAN) OR a wireless adapter (Wi-Fi)

1.4 ADVANTAGES AND LIMITATIONS OF THE PROPOSED SYSTEM

Advantages

- It is trouble-free to use.
- Best user interface.
- Track order details.
- Customer can buy any product 24*7 online.
- Saves time and efforts.
- Good discounts / lower prices.
- Gets detailed information about the product.

Limitations

- User cannot directly purchase the product without registration.
- Since, it is an online website, customers need internet connection to buy products.
- People who are not familiar with computers can't use this system.

2. REQUIREMENT DETERMINATION & ANALYSIS

2.1 REQUIREMENT DETERMINATION

Admin -

The system allows the admin to add/delete update product.

The system allows the admin to view customers.

The system allows the admin to change/forget password.

The system allows the admin to view cart.

The system allows the admin to view customer's order.

The system allows the admin to view customer's comment.

Users -

The system allows the users to order a product.

The system allows the users to add a product in a cart.

The system allows the users to view product details.

The system allows registration to all the users.

The system allows the users to give comments on the product.

4. AGILE DOCUMENTATION

4.1 AGILE PROJECT CHARTER

Agile Project Chapter	
General Project Details	
Project Name	Online Tech-Gadget Selling System
Project By	Vishnu Chauhan, Jay Leshwala, Mitali Jivani
Start Date	20 / Feb / 2023
End Date	20 / May / 2023
This system sells tech-gadgets like CPU Cooler, Mouse, Graphics card, SSD etc. Customers can buy products by adding it in a cart or wish list.	

4.2 AGILE ROADMAP / SCHEDULE

1 st Quarter	2 nd Quarter
21/Feb/2023 to 25/Mar/2023 Understand project definition, gather requirement, finalized the project scope, Target User, Core Component and to learn ASP.NET C# web Frame work and make an admin side and user side in ASP.NET project.	26/Mar/2023 to 10/Apr /2023 we design and set the system and draw various diagram such as: ❖ Use case Diagram ❖ Activity Diagram ❖ Class Diagram For system and prepare data dictionary.
3 rd Quarter	4 th Quarter
11/Apr/2023 to 25/Apr/2023 We learn ASP.NET and prepared front-end side of our project and test validation in all pages and make document side by side.	25/Apr /2023 to 10/May/2023 We implemented another tables for more easy to use question paper and analysis. We implemented another template for basic question paper set and saved and documentation is prepared side by side.
Final Quarter	
11/May/2023 Final presentation and final documentation to be done.

4.4 AGILE USER STORY

- A user story is an informal, general explanation of a software feature written from the perspective of the end user. Its purpose is to articulate how a software feature will provide value to the customer.
- It's an end goal, not a feature, expressed from the software user's perspective.

Story Point	Story
1) Admin Logs	As an admin, I can manage and view the admin logs like product and its category, orders, customer complaints, profile, add new admin, manage user role etc.
2) User Logs	As and User, I can add products in wish list, cart, view items, own profile, place orders, see the order history and also track the order status etc.

Description

Reviews

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

6. PROPOSED ENHANCEMENTS

- Registered user can see the bill information on his/her email address.
- More security features will be added.
- User can get Cash on Delivery (COD) option to make payments.
- More varieties in tech-gadgets will be added so that user can make a better choice.
- User can generate invoice on every order.

7. CONCLUSION

- It is a system that allows users to check for various gadgets available at the online store and purchase online.
- The project consists of list of tech-gadgets displayed in various categories.
- The user may browse items as per the categories.
- If the user likes a product he/she may add it to his/her shopping cart and can make a order online by sitting anywhere.

Thus, the online tech-gadget system project brings an entire gadgets shop online and makes it easier for both buyer and seller.
